iCode Assurance: Coding Audit Software

GeBBS' iCode Assurance analytics platform delivers risk assessments that identify codes and claims to provide our clients with real-time feedback on compliance and revenue impacted risk + financial opportunity. Our innovative workflow platform allows for immediate corrective action to remedy risk and delivers robust reporting metrics around results and education, that also validates a strong positive ROI impact.

iCode Assurance allows clients to use their team, GeBBS' team, or a combined team to utilize our robust workflow engine that reviews all encounters for potential risk.

Benefits of iCode Assurance

- ✓ Decrease Labor Costs
- ✓ Reduce Compliance Risk
- ✓ Expand Capacity to Review Added Encounters
- ✓ Mitigate Denials
- ✓ Increase Revenue
- ✓ Improve Efficiencies

Enhanced Features of iCode Assurance

✓ **One Platform for All Service Types and Workflows:**
Streamline all concurrent and retrospective coding and auditing efforts into one tool. iCA covers coding for all points of care including inpatient, outpatient, professional, performance measures and HCC.

✓ **Customization:**
iCA is configurable and can be customized to fit all workflow and reporting needs. GeBBS' team of 100+ dedicated software experts are readily available to quickly support customization and deliver a distinctive product that encompasses requested specifications.

✓ **Autonomous Review:**
Autonomous review conducts a dual-level coding and review process to minimize human intervention, thereby enhancing productivity and quality while reducing denials. This streamlined approach also contributes to a more seamless healthcare journey for patients, fostering greater satisfaction and trust.

✓ **Optimize Compliance with Analytics:**
Enhance or replace current coding and compliance workflows. iCA provides effective and automated tools to identify risk and immediately act upon opportunities.

✓ **Denial Prediction:**
Foreseeing denials alleviates claim rejections, reduces the need for rework, enhances cash flow, and increases the clean claim ratio.
